EDUCATION

M.T.I Diploma
**Metallurgical Training
Institute, Onitsha, Anambra
State**
2018 - 2021

SPOKEN LANGUAGES

English
Igbo
Nigerian Pidgin

PROFILE

My interest in programming began towards the end of 2019, when I started writing arduino code to blink LEDs. Then, I learnt a bit of Java/Android and built a basic quiz app which almost everyone in my class used to prepare for one of our class tests. I then dabbled in a few other technologies. Finally, in 2021 I started exploring the wonderful world of web development and I've come to love the MERN and Nextjs ecosystems.

CAREER GOALS

My current career goal is to collaborate more with other developers especially more experienced engineers and learn from them so I can become a better fullstack engineer

PROJECTS

Speed Type

A typing test application for practicing typing on a keyboard. This project was built using Reactjs and plain css

Frontendmentor challenges

- [Loop studio landing page](#)
- [News Homepage](#)

WORK EXPERIENCE

Junior Fullstack Web developer

Magic Pitch (magicpitch.ai) 1 June 2023 - Nov 1 2023

- worked on the frontend for a landing page website
- worked on the frontend of a customer-facing email marketing software
- worked on a csv file parser for an internal tool
- mostly worked with Nextjs, Reactjs and Tailwindcss during this job
